ENGINEERING

HYDRAULIC TWIN BALE FEEDER

Features;

- 6mm RHS one piece chassis for superior strength
- Heavy duty 3" long link 6000 pound conveyor chain Australian made
- High quality hydraulic pump
- Heavy duty axles, 3 ton load capacity
- Feeds out either side, hay or silage at variable speed
- Has a deep 20" chamber so that silage cannot try and ride out of chamber
- Has a flat floor so that when the hay or silage starts to unwrap the bale can move away to continue unwrapping
- Carries two bales, one in chamber and one on forks
- Has a twine box to store old twine or plastic wrap
- Has inch and a half shaft for the two drive shafts for extra strength
- all pivot points are greasable
- Has hinging forks with a low hinging point for safety when reversing backwards to spear a bale
- Adjustable towing hitch for varying drawbar heights

Also manufacturing:

- V-Rakes
- Inline Rakes
- Round Bale Collector

V - Rake

Sold and Serviced by
